Articles in Advance

In an effort to continue the mission of education of the OR/MS community, INFORMS has initiated *Articles in Advance*, the release of peer-reviewed, revised, typeset, copyedited, and author-approved articles made available online in advance of their appearance in a printed issue of *Operations Research*. The content of the *Articles in Advance* version is the same that will appear in a printed issue of the journal, minus the assignment of page numbers and volume/issue numbers. The history line of the printed article contains the date it was posted online in *Articles in Advance*. For more information and to access *Articles in Advance* for *Operations Research*, visit <http://or.journal.informs.org/>.
